

KADI HSE CONSULTANCY

Knowledge • Assurance • Discipline • Integrity

Fixing HSE systems that fail
in real operations.

From compliance to
real risk reduction.

20+ years in high
risk operations.

ABOUT KADI

KADI Consultancy delivers practical, field-validated HSE solutions tailored for high-risk industries, specializing in HSE consulting. We support organizations across Oil & Gas, logistics, warehousing, manufacturing, and SMEs, helping them achieve measurable risk reduction, full compliance, and sustainable HSE performance.

Experience highlights: 20+ years in high-risk operations, direct experience in managing operational HSE risks, proven track record in risk reduction and compliance, hands-on implementation, not advisory only.

Our approach is simple: we don't design systems, we make them work on-site.

OUR VISION

To be a trusted HSE partner known for fixing operational risks, not just compliance gaps.

OUR MISSION

To deliver HSE systems that work in real operations, reduce incidents, and sustain compliance beyond audits.

OUR SERVICES

At KADI, we go beyond documentation. We deliver practical, field-validated HSE solutions that are designed to work in real operations.

Practical HSE Solutions

We develop and implement HSE solutions that are directly applicable on-site, ensuring real risk reduction in on-site performance.

HSE Gap Assessment

We assess your current HSE systems against Omani regulations and international best practices, identifying gaps before audits expose them, with clear, actionable priorities.

HSE Audits & Inspections

We conduct structured audits and field inspections to identify gaps, reduce risk exposure, and improve on-site HSE performance.

OUR SERVICES

Risk Reduction & Control

We identify operational hazards, assess risks, and implement control measures aligned with ALARP principles, focusing on real risk reduction, not theoretical compliance.

HSE System Setup for SMEs

We design and implement scalable, cost-effective HSE management systems tailored for SMEs, enabling compliance, operational efficiency, and sustainable growth.

Compliance & Regulatory Support

We support organizations in aligning with Omani regulatory requirements, including Environment Authority and Civil Defence expectations, ensuring full compliance and audit readiness.

HSE Documentation & System Development

We develop customized HSE manuals, procedures, policies, and corrective action plans, fully aligned with your operations and regulatory obligations.

OUR SERVICES

We provide specialized, high impact HSE solutions for complex operations:

- Hazard Identification & Risk Assessment (HIRA)
- Development of HSE policies, procedures, and standards
- Environmental Aspect & Impact Register
- Permit to Work (PTW) and Lockout/Tagout (LOTO) systems
- Intelex System Integration
- Incident Investigation & Root Cause Analysis
- Emergency Response Planning & Drills
- Coaching for safety performance improvement
- Chemical safety and hazardous materials management
- Civil Defence & EA Compliance Support
- Contractor HSE Management Systems

WHY KADI

- We don't leave until the system works on-site.
- Strong experience with EA & Civil Defence approvals.
- Field-validated solutions, not theoretical frameworks.
- Flexible support for SMEs and large operations.
- Our team members bring extensive hands-on and leadership experience, having served across a wide range of industries, including Oil & Gas, Utilities & Infrastructure, Logistics, Aviation Fuel & Terminals, and Electrical & Construction Projects.

**We focus on real risk reduction,
not theoretical compliance.**
